

Logistics Resilience

*Securing Federal Supply Chains Through Intelligence,
Integration, and Innovation*

Understanding the Federal Logistics Challenge

Federal supply chains must now operate in a world of dynamic risk. Logistics operations face increasing pressure from:

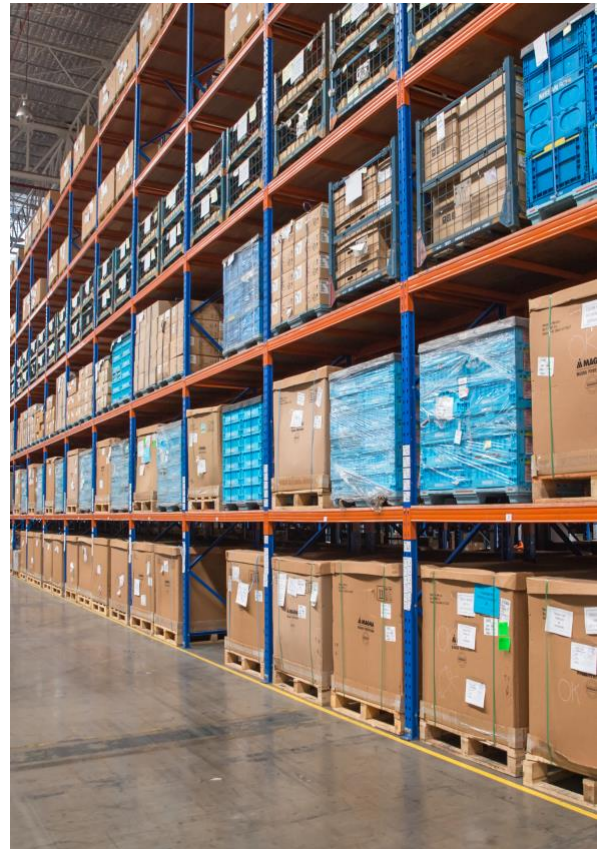

- Rising cybersecurity threats to inventory and procurement systems
- Geopolitical tensions impacting sourcing, shipping, and storage
- Budget constraints that demand efficiency, automation, and reporting
- Stakeholder demands for transparency, sustainability, and readiness

Traditional logistics models are no longer enough. Today's mission requires agile logistics strategies aligned with predictive analytics, responsive staffing, and modern platforms designed for federal environments.

Introduction

Strativia understands that logistics is not just about transportation—it is a vital enabler of federal mission success. From managing thousands of physical assets across the country to supporting surge operations and property management for national security agencies, we bring clarity, control, and confidence to the federal supply chain.

As the federal government faces heightened supply chain complexity—driven by global disruption, digital transformation, and evolving security threats—agencies require logistics partners who not only deliver materials, but ensure operational continuity, data visibility, and compliance along the way.

Strativia's Federal Logistics Delivery Model

Strativia supports end-to-end logistics, warehousing, and property accountability programs through a structured, technology-enabled model. Our team brings:

- Program and site-level leadership, including Program Managers and Deputy PMs
- Fully staffed CONUS warehouse and mission support center operations
- Mobile asset management systems and secure web-based inventory portals
- 24/7 readiness for receipt, staging, inventory, and disposition of federal assets
- Rapid onboarding strategies to meet nationwide surge and transition needs

Our delivery approach integrates people, platforms, and procedures to ensure reliable logistics support that scales with mission tempo and geographic spread.

Built for Scale: Technology-Driven Solutions

Strativia develops and deploys logistics systems tailored to agency needs. Our work includes:

- Deployment of commercial off-the-shelf (COTS) property management systems
- Automation of lifecycle asset tracking and metadata-based workflows
- Inventory control with barcode, RFID, and mobile scanning integration
- Real-time dashboards for personnel scheduling, asset visibility, and reporting

These tools are designed to improve auditability, reduce manual burden, and enhance resilience in the face of change or disruption. Whether managing high-value equipment or serialized government property, our systems deliver transparency and control across the full logistics lifecycle.

Case Snapshot: Nationwide Logistics Readiness

Strativia supports logistics programs for high-security and mission-critical agencies. We have deployed **dozens of cleared and uncleared personnel to logistics and support locations worldwide**, supporting agencies including the **U.S. Army, Navy, Department of Energy (DOE), Export-Import Bank (EXIM)**, and others.

In one recent engagement, our team stood up multiple warehouse support centers within days of award. We implemented site-specific standard operating procedures, integrated digital asset tracking platforms, and established full-cycle inventory accountability protocols—from staging to disposal.

Our ability to scale quickly while maintaining high accuracy, compliance, and continuity reflects our readiness to meet the demands of the modern federal supply chain.

The Strativia Commitment: Logistics That Deliver Confidence

Strativia brings the **rigor of a prime contractor** and the **agility of an innovation partner**. Our ISO-certified frameworks, nationwide staffing capability, and mature operational processes allow us to deliver logistics programs that are secure, responsive, and aligned with agency objectives.

Whether your agency is preparing for 4PL transitions, managing enterprise property systems, or modernizing field logistics operations, Strativia brings the tools, talent, and trust to get it done.

Let's move the mission—together.
