# Assured by Design

Advancing Information Assurance  
and Cybersecurity Maturity Across  
the Federal Enterprise

## Introduction

---

Strativia understands that information assurance (IA) is not a checkbox—it is a mission-critical discipline that underpins every federal system, decision, and delivery. In an environment shaped by persistent cyber threats, dynamic compliance landscapes, and rising complexity, agencies need assurance

partners who move beyond documentation and into true operational resilience.

We support customers across civilian and homeland security agencies in modernizing their security postures through proactive frameworks, measurable controls, and automation-enabled governance.

## Understanding the Assurance Challenge

---

Today's federal IA environments face challenges that go far beyond traditional security boundaries:

- **Continuous and automated compliance across multiple control families**
- **Evolving NIST, FISMA, DHS ISPP, and FedRAMP baselines**
- **System-of-systems complexity across cloud, hybrid, and legacy platforms**
- **Increasing pressure to deliver real-time reporting, RMF traceability, and ISSO readiness**
- **Threats targeting both infrastructure and institutional trust**

Assurance in this climate means not only protecting systems, but making security a visible, predictable, and continuously improving part of mission delivery.

## Strativia's IA and Cybersecurity Delivery Model

---

Strativia supports end-to-end information assurance and cybersecurity operations aligned with NIST frameworks, DHS standards, and agency-specific performance plans. Our capabilities include:

- ✓ System Security Planning (SSP), Control Implementation, and Risk Assessments
- ✓ RMF lifecycle execution across high-impact environments
- ✓ ISSO staffing and ISSM advisory support
- ✓ Audit readiness, documentation management, and remediation planning
- ✓ Security authorization support, POA&M management, and policy alignment
- ✓ Development of automated tools and dashboards for compliance tracking

As a **CMMI Level 3**, **ISO 9001**, and **ISO 27001** certified contractor, we deliver IA services that are process-driven, secure, and consistent—ensuring both compliance and mission continuity.

## Case Snapshot: USCIS IASS 2 Program

---

Strativia supports the Department of Homeland Security (DHS) and U.S. Citizenship and Immigration Services (USCIS) through the Information Assurance Security Services 2 (IASS 2) program. We serve as a key delivery partner to USCIS's Information Security Division (ISD), enabling innovation, automation, and measurable performance within the agency's Risk Management Program.

Under IASS 2, we deliver:

- ✓ **Assessment and optimization** of ISSO services in alignment with NIST Risk Management and Cybersecurity Frameworks
- ✓ Support in achieving **FISMA performance scores** above DHS thresholds
- ✓ Development of **automated compliance tools** and reporting frameworks
- ✓ Implementation of **metrics and dashboards** to track performance across IA functional areas

Our teams help ensure that USCIS not only meets compliance targets, but builds the infrastructure to monitor, maintain, and improve its security posture in real time.

**“Strativia delivers ISO 9001-certified quality, ISO 27001-secured operations, and CMMI Level 3 repeatability—on every cybersecurity mission.”**

## Operational Focus Areas

---

Strativia's IA services are built for scalability, clarity, and sustainability across federal agencies. Our delivery spans:

- ✓ **Agile Risk Management:**  
Incorporating continuous monitoring, risk scoring, and authorization tracking
- ✓ **Automation in Assurance:**  
Custom tools for tracking POA&Ms, audit findings, and security controls
- ✓ **Framework Fluency:**  
Support for compliance with FISMA, NIST 800-53/800-37/800-137, OMB A-130, and ISPP
- ✓ **People-Centered Security:**  
Empowering ISSOs and security teams through training, collaboration, and advisory support

## The Strativia Commitment: Secure by Process, Assured by Design

---

At Strativia, we view information assurance as a living process—not a one-time event. Our cleared personnel work alongside agency teams to operationalize compliance, embed resilience, and ensure federal systems are not only protected—but future-ready.

With national reach, Tier 1 cybersecurity partnerships, and proven performance at DHS, DOE, DOD, and more, we bring rigor, innovation, and responsiveness to the heart of your security mission.

**Let's secure the mission—together.**
